Border Park Organics 2018 CSA Member Products

YEARLING BEEF

Very few can resist the taste of a great steak or a homemade chunky beef pie. Our organic yearling beef packs mean you'll be spoilt for choice, and you'll be left reminiscing about the flavour of the meat long after the meal is over.

Each box typically includes a range of cuts such as well-known steaks (blade, rump, scotch fillet, porterhouse or eye fillet), diced steak or stir-fry strips, beef roasts and mince. The cuts in our beef boxes will be chosen with the season in mind and may change depending on availability. Each group of meat cuts will be either bagged, cryovaked or trayed, and individually labelled.

Our certified organic yearlings are up to 18 months of age, are born and bred on farm, and are solely pasture-fed.

A NOTE ON OUR LAMB, HOGGET AND MUTTON PACKS *

Please note that we have made three specific changes to our member sheep packs for 2018.

You may wonder why?

It's simply because we've realised we need to streamline and improve our livestock handling and admin practices.

- 1. For the most part, our lamb packs will consist of lamb, but hogget may be included if necessary** (both taste yummy!). Where possible, we'll do our very best to supply customers with lamb. However, as the year progresses (and the lambs grow up), we may occasionally include hogget in your order in place of lamb. We're sure you'll enjoy the slightly deeper flavour of hogget - which is very similar in taste and tenderness to lamb - and is actually the meat of choice for the majority of our customers.
- 2. We no longer have hogget as a specific option to purchase.** Each year, all our lambs and hoggets are born within a few months of each other. This means while some are still classified as lambs, others have lost a baby tooth and become a hogget. There is very little (if any) difference in *flavour* or *weight* at this point. We've even had lambs lose their baby teeth and become classified as hoggets in the days between selection and transport! The extra handling of each individual animal to 'mouth' them (literally to count their teeth!) makes for a long day and a sore back! This is why we'll be supplying either lamb or hogget.
- 3. Our Half and Whole sheep packs will vary in weight throughout the year.** Each animal is unique - some have more muscling, and others grow wool faster - and grow at different rates. We've based our member pack prices on average weights for the past few years. Some months you may receive more than the anticipated weight of your pack, and other months, it may be a little less. In order to reduce our admin time, costs for these packs are now charged based on production and processing costs rather than the specific boxed weight of each animal. Where possible, we'll aim to keep all packs close to their expected weights.

COMBO PACKS (BEEF AND LAMB)

Really can't decide if you'd prefer a lamb leg roast or a scotch fillet steak? We know it's a tough decision! If you purposefully choose to eat better meat less often, you'll love the convenience of our organic Combo packs that contain both beef and lamb.

Each box will be unique but will include a range of well-loved cuts including steaks and chops, slow-cooker favourites like diced beef and lamb shanks, and a lamb or beef roast in the larger packs. The mix of your kilos may vary based on availability (we may be low on lamb one month, so we'd include more beef). Each group of meat cuts will be either bagged or cryovaked, and individually labelled.

All our beef and sheep are certified organic, born and bred on farm, and are solely pasture-fed.

THE HIDDEN TREASURE (Mince with organ meat)

There's a growing awareness about the enormous health benefits of eating more organ meats. Although previous generations consumed organs with apparent ease, our modern palettes often balk at the flavour and textures.

Our family were no different, which is why we originally developed this range of 'boosted' mince. Specifically, we wanted to bypass the texture and 'ickiness' factor, and still benefit from the vast array of nutrients contained in organ meats.

Our Hidden Treasures mince range will be cryovoked and labelled.

BOOSTED BEEF MINCE

Beef NutraMince - \$17/kg. Beef cuts minced with 25% beef or lamb hearts

Beef Iron Man Mince - \$17/kg. Beef cuts minced with 15% beef liver

*BOOSTED LAMB MINCE ***

Lamb VitaMince - \$15/kg. Lamb cuts minced with 15% lamb hearts and kidneys

Lamb Iron Man Mince - \$15/kg. Lamb cuts minced with 15% lamb liver

** either lamb or hogget will be provided, depending on availability

PhantomPDF is Foxit’s premium package and you don’t need it for our purposes.

When you see this pop-up, click “Not Now”.

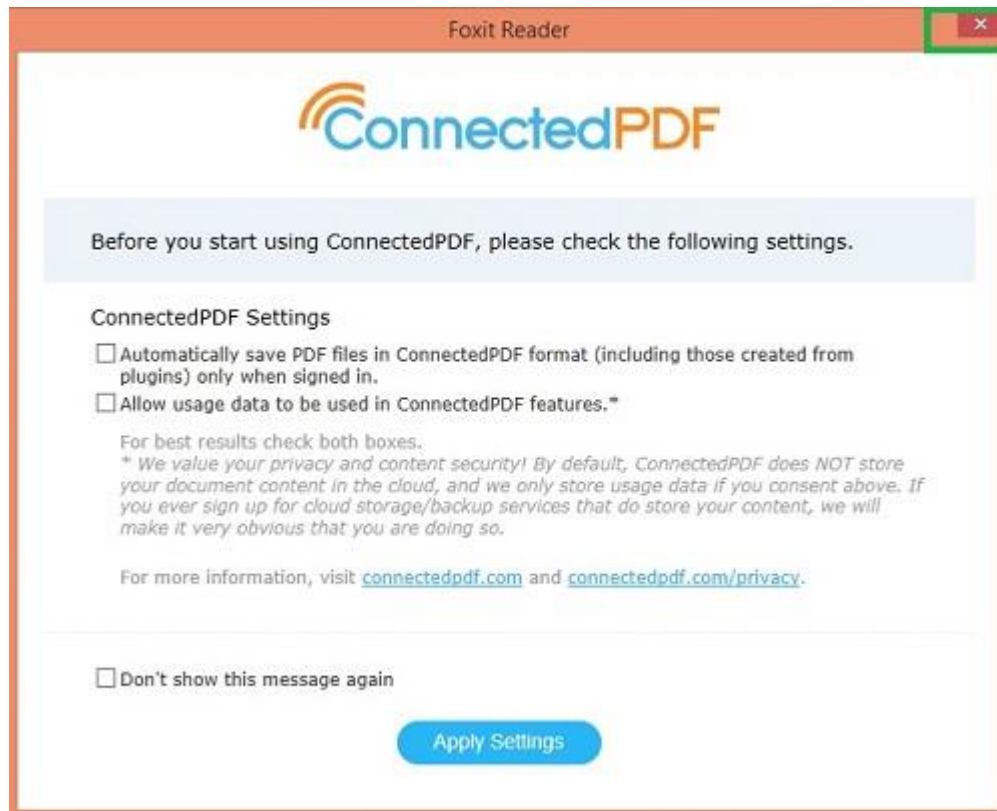

You don’t need to register for online support. If you do want to, we recommend doing it later.

How to use Foxit?

Once you've downloaded Foxit, open the PDF...

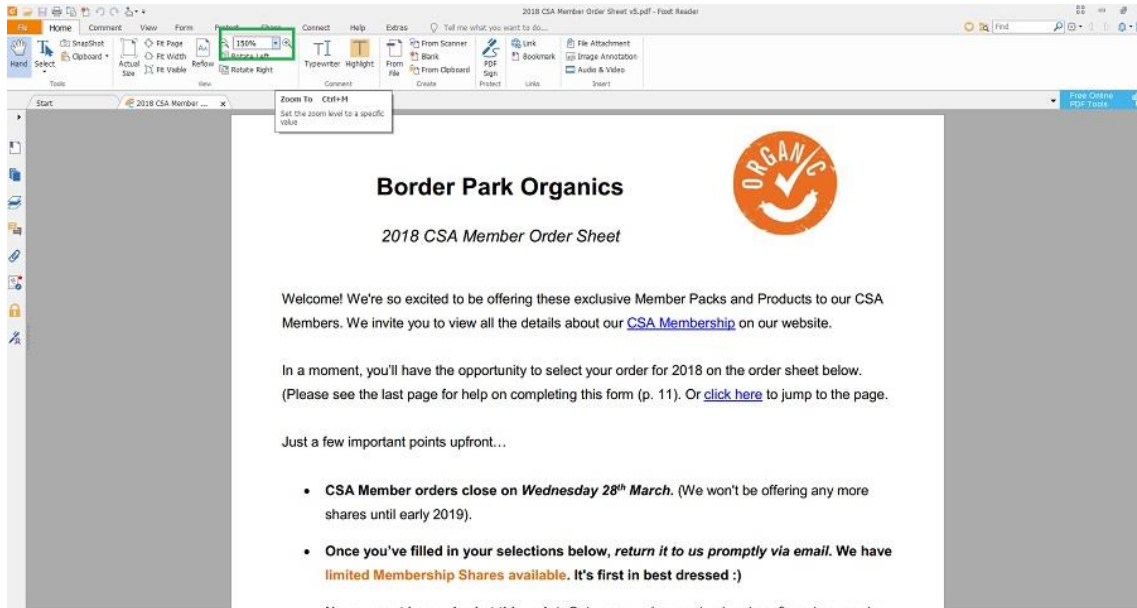

You may be presented with this pop-up. If so, click the close button in the top right-hand corner.

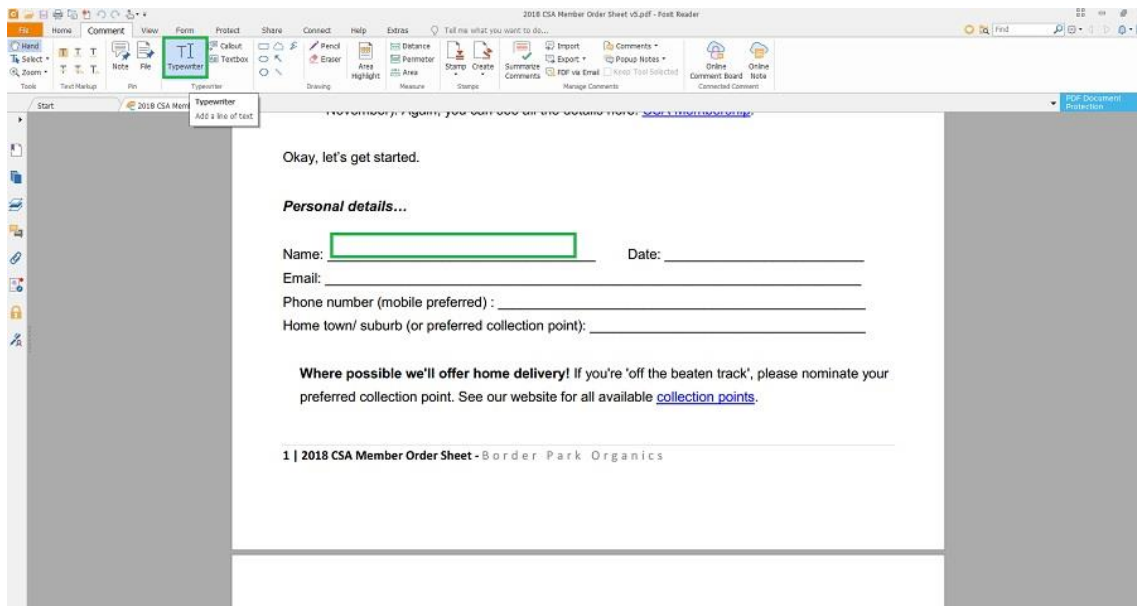

ConnectedPDF is feature you don't need for our purposes.
